

Monarch® Renegade® 4 Printer

The best just got better. The Monarch Renegade 4 portable printer maximizes shipping productivity, saves time and steps, and helps ship products on time and on target. For added efficiency, the printer meets major retailers' UCC/EAN-128 shipping compliance requirements.

Enhanced features, inside and out. The Monarch Renegade 4 printer has five enhanced labor-saving features that boost economy and efficiency in the warehouse and on the retail sales floor.

- **Monarch Renegade 4 Printer Boot** is designed for industrial environments and tough DC applications where durability, shock resistance and protection are a must. The water-resistant, monprene casing protects the printer, provides full inner access, and is easy to install and remove.
- **Vehicle Mount** and optional fan-fold supply holder make the Monarch Renegade 4 printer an on-line shipping station that can be mounted on a forklift. A new knob kit makes it easy to load supplies while the printer is mounted. Electrical updates include a convenient fuse and connectors.
- **Internal RF Link** provides the ability to detect, transmit and receive information between the printer and data collector – without cables!
- **Cable Cover** increases cable connection protection, enhancing usability.
- **Flash Memory** loaded into the main CPU chip facilitates programming printer software in the field.

EFFICIENT AND PORTABLE, DURABLE TO BOOT.

PAXAR

The Power of Identification™

Stationery compliance labeling.

The Monarch® Renegade® 4 is designed for efficient maintenance of compliance requirements. Consumer goods manufacturers scan product ID labels and upload data. The order is automatically linked to retailer-specified shipping information. An Advance Shipping Notice is generated and sent via EDI. UCC/EAN-128 shipping labels are then printed.

Portable compliance labeling.

When portability is preferred, an associate downloads the purchase order item and quantity data, then carries the lightweight, portable Monarch Renegade 4 printer to the warehouse to pick, scan and pack the order. With each scan, the terminal checks off the items required, prompting the associate with each item ordered until the order is completed. The terminal then prompts the printer to produce the appropriate shipping label.

Manufacturing shipping labeling.

Manufacturers implementing EDI and bar code shipping label systems benefit from the accuracy and economy of portable data collecting and printing, on or off site.

Distribution center labeling.

The forklift-mounted Monarch Renegade 4 printer is an ideal back-up printer on the shipping dock or in the DC to handle product ID or carton routing labels for goods shipped to retail stores or back to vendors.

A shipping station on the go.

- Sales are increased and inventories turn more rapidly because orders are scanned, labeled and packed in seconds!
- Accuracy and productivity are increased with a portable printer that goes to the job, reducing mistakes and paperwork.
- With a Monarch portable printing system it is a win-win situation. Faster shipping. Faster payment. Excellent work. And finally, increased customer satisfaction.

Full of features. Full of value.

The Monarch® Renegade® 4 printer is feature rich and packed for performance.

- **Complete versatility for utmost efficiency:** carry the printer to the job, install it on a forklift or mount it on the wall.
- Prints 4" x 6" compliance shipping labels at top speed for **increased efficiency.**
- Portability **eliminates repeated walking** to a stationary printer.
- Thermal direct/thermal transfer printing creates **crisp, clear labels that resist fading.**
- **Durable** monprene boot stands up to industrial wear and tear.
- On-line to portable data collector for **immediate, accurate inventory updates.**
- **Pre-formatted label designs** meet major retailers' compliance specifications.
- **Versatility printing:** bar codes, alpha-numerics and graphics.
- Windows-based software **designs label formats with ease.**
- Integrates EDI with UCC/EAN-128 serialized bar code label printing for a **complete pack/ship/verify system.**
- Easy-to-load, drop-in supplies and ribbon **improve productivity.**
- AC adapter, rechargeable battery pack, carrying holster and mounting kit **increase flexibility, convenience and ease of use.**
- Internal RF link provides ability to detect, transmit and receive information between the printer and data collector—without cables.
- Cable cover **protects connections.**
- Flash memory **facilitates programming software in the field.**
